

Lesson 12

Decommissioning Servers

Topic 12A

Decommission Servers

Exam Objectives Covered

- 3.6 Summarize proper server decommissioning concepts

Decommissioning Policies

- Plan for Server Decommissioning
- Document the decommissioning process
- Company Policies
- Verify Server Status

Media Destruction

- HDD Disposal
- Media Retention Requirements

Cable Remediation

- Network Cable Remediation
- Power Cable Remediation

Electronics Recycling and Repurposing

- Repurpose Within the Organization
- Donations
- Recycling

Guidelines for Decommissioning Servers

- Ensure services hosted on the server are no longer necessary or have been migrated to another server
- Data sanitization refers to the proper removal of data stored on HDDs
- It is not difficult to recover deleted data from storage media, so magnetic or physical destruction of the drive is required
- Remove and recycle unused network cable media
- Consider repurposing older hardware within the organization
- Consider donating older hardware
- Recycle computer components properly, because many contain toxic or harmful substances

Review Activity: Server Decommissioning
